## EXPERIENCE

### — **Frontend Developer**, Fidelity Information Services , Bangalore, India

Dec 2016 - Feb 2020

- ❑ Responsible for analysing the requirements, eliciting the validations required for the functional requirements and developing the application UI mainly using Angular, TypeScript, HTML5 and CSS3.
- ❑ Participates in design reviews and provides input to design recommendations.
- ❑ Collaborates with the team on implementing new features and UX in an Agile environment.
- ❑ Provide technical excellence and mentoring to peer developers and junior team members.
- ❑ Review the quality of code for the high-volume internal web application resulting in improvement in code readability and performance.

### — **Frontend Developer**, Exilant Technologies , Bangalore, India

Aug 2012 - Dec 2016

- ❑ Developed the user interface with HTML, HTML5, CSS, CSS3, Javascript, jQuery, jQuery Mobile, Sencha Touch.
- ❑ Responsible for ensuring the applications developed are cross browser compatible.
- ❑ Developed design documents and provided estimates for the client requirements.
- ❑ Performed multiple assignments under pressure and consistently met deadlines given.
- ❑ Got appreciated by the client for delivering high quality UI with the best UX.
- ❑ A self-starter who can effectively balance and prioritize multiple projects concurrently.
- ❑ Participate in code reviews and ensure that all solutions are aligned to predefined design specifications.
- ❑ Solely refactored the code and maintained a native iOS application to make it compatible with the latest iOS version and different iOS devices.
